DETAILED ACTION

Allowable Subject Matter

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or make obvious the claim limitations of: (claim 1) an addition image generation module that generates a first addition image and a second addition image, respectively including images of still pictures at different discrete time points with the images being added at different ratios, by sequentially timewise adding images of still pictures at individual discrete time points included in the motion picture to be analyzed and a motion detection module that detects a motion component in the motion picture to be analyzed, by comparing with each other said first addition image and said second addition image generated by said addition image generation module; (claim 11) an addition image generation module that generates a first addition image and a second addition image, respectively including images of still pictures at different discrete time points with the images being added at different ratios, by sequentially timewise adding images of still pictures at individual discrete time points included in the motion picture to be analyzed and a movement direction detection module that detects a movement direction in the motion picture to be analyzed, by comparing said first pixel group taken out by said first matrix development module with said second pixel group taken out by said second matrix development module, while spatially shifting these groups; (claim 17) a step of generating a first addition image and a second addition image, respectively including images of still pictures at different discrete time points with the images being

added at different ratios, by sequentially timewise adding images of still pictures at individual discrete time points included in the motion picture to be analyzed and a step of detecting a motion component in the motion picture to be analyzed, by comparing with each other said generated first addition image and said generated second addition image; (claim 19) a procedure of generating a first addition image and a second addition image, respectively including images of still pictures at different discrete time points with the images being added at different ratios, by sequentially timewise adding images of still pictures at individual discrete time points included in the motion picture to be analyzed; and a procedure of detecting a motion component in the motion picture to be analyzed, by comparing said generated first addition image and said generated second addition image.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
